

Earn From \$1000 - \$1500 Per Month On An Outlay Of \$24.95

And that is just for starters

How To Start A Small Business For Just \$24.95

If you would like to start a small business but are not sure exactly what to do especially if you have limited capital, this could be just what you need because you can literally start this business with just \$24.95.

You do pay this \$24.95 every month but it is still a great way to get started with your own web hosting business with one of the best hosting companies around for only a small amount of money. Just think how much you would pay to start a normal retail business – premises – rent – heating – service charges – business rates. There is just no comparison to an ordinary business but you can still make big money.

Hostgator is one of the fastest growing private companies in America hosting over 4,000,000 domain names and with over 225,000 customers. In fact Hostgator handles around 1% of the world's internet traffic, so you know you are with a great company with a fantastic support team.

In order to keep up with the company's rapid growth, HostGator moved from its original office in Boca Raton, Florida into a new 20,000 square foot office building in Houston, Texas. Since moving to Houston in January 2007, the company has added more than 200 employees. The company is growing rapidly and expects to add roughly 200 employees within the next two years.

There are no long drawn out details to this method of making money with your own hosting business but it does work. **I have done and you can do it too.**

[Click Here](#) to look at the Hostgator website so that you can see what you get for just \$24.95 per month.

So, you get 50gb of web space with a bandwidth of 500gb and unlimited domains. Remember that.

The basic idea is to share out this space to your customers. There are lots of combinations but just to give you some examples.....

A Starter Plan..100mb space with 500mb bandwidth - \$2-\$3 per month

Business Plan.. 1gb space with 1gb bandwidth - \$5-\$6 per month

Executive Plan..5gb space and unlimited bandwidth \$7-\$8 per month

Those prices are quite competitive in price but the good thing about it is that you charge higher or lower prices. In fact whatever you think you can get.

The actual sizes of the hosting you provide to your customer is not set in stone though because you can tailor them to whatever your customer wants. What you are interested in is how much money you can make.

To keep the calculations simple say that you share your 50gb space into starter plans. These are great for people who just want a simple site to advertise their business and do not require a lot of hosting space or bandwidth.

So at 100mg you can make 500 hosting sites and also give them each 500mb bandwidth. Charge them \$2 per month and that is \$1000. Charge them \$3 and that is \$1500 – get the idea.

You can see that you are going to make more money selling the starter plans but that is OK because there is a great demand for starter sites.

Also, have you thought about that if you have a few websites of your own, say for various niches or hobby pages this is going to work out cheaper than buying regular hosting.

When you buy your reseller hosting you control everything through your own control panel and every site you sell, your customer also gets their own cpanel which makes it so easy for them to control their site.

In time you will run out of space but that is just a simple process of upgrading your account and then you can sell more hosting and make even more money.

When you buy your reseller hosting you will need to choose a name for your business and hopefully be able to buy that name as a domain name as well.

When you have done that, you set up your first website for yourself and on this site you can set up details and prices for your hosting so that you can send people to your site and turn them into customers.

If you have never made a website before, do not worry because you can choose one of many templates available to you, add a few details and the site is more or less built for you automatically.

It is so easy – there are hundreds of tuition videos for you and your

customers to look at to make both yours and your customers' experience a pleasant one. It really is so easy – everything you need and all the tutorials are right there with you on your control panel. When you have set up your own site you will see how easy it is.

When I started I attracted my customers both online and offline but I didn't spend a fortune on advertising. Offline, I used small classified ads in local newspapers. I put free ads on supermarket displays and in shop windows, which are cheap. Online, I used free classified ads sites, a paid classified ad site and forums using my site in the signature. You can also make a few free blogs advertising your service and ping them regularly with sites such as Pingler.com.

With all the above exposure you will be surprised at how quickly you can build up a large number of clients. You can even offer them a free first month because once they have set everything up it is unlikely that they will want to lose their site.

I have covered most things that you need to know and this is from my own experience because when I started I had no information, like this report to work from. I just did it!

If you would like to start your own business, just do it, do not let people put you off or you will never get anywhere in life. [Click Here](#) now and get started!

If you have a hobby or a niche business and would like a great news type website similar to sites that are included in Google News look at this – everything is done for you up to the point where you start including your own content.

You Get a Professional Template, Domain Name, Free Hosting for a year and everything set up for you.
